Home and sixty scattering. SAVINGS OF THE COLORED PEOPLE. -The January number of the National Savings Bank, published monthly at Washington, D. C., gives a very interesting statement of the savings of the colored people up to December 1st, 1868, through the agency of the trust fund companies, instituted since the war, in the South. The figures show that in twentyfour branches of the freedmen's savings banks-all located in the Southern States except one in New York city-the aggregate savings of the colored peo. ple have been 1932,859 for eleven (months up to Decomber 1st, 1868, against \$558,673 for the s'me period in the previous year—an increase of \$376.216. The total number of depositors is 9000. The branch at Washington shows the largest aggregate deposits and increase. On December 1st, 1867, the deposits in the Washington concern were \$53,959, and on December 1st, ultimo, they were nearly doubled, footing up \$115,495. The increase at Baltimore was nearly in the same ratio; the previous year's deposits amounted to \$46,771, and this year they stand \$74,-'738. At Beaufort, South Carolina, the increase was from \$48,618 to \$77,728. At Memphis the advance was from \$13,673 to \$32,793. Figures like these, showing nearly a million dollars already saved by nine thousand people, hitherto almost wholly unac quainted with money, speak better than words, and give point to the moral of that solid independence founded upon an account in the bank.

Charleston, January 1, 1859. THE THEATRE. The weather was very pleaeant last evening, and Hibernian Hall was filled with a large and fashionable audience to welcome back to Charleston the old favorites of the Temple ton troupe. GROVER & BAKER'S FAMILY SEWING MACHINES.

THE VERY HIGHEST PRIZE—THE IMPERIAL Cross of the Legion of Honor—was conferred upon the representative of the GROVER & BAKER SEWING MACHINES at the Exposition Universelle,

Paris, 1867.
The GROVER & BAKER FAMILY SEWING MAOHINES are the only Machines that can both sew
perfectly and embroider perfectly.
They sew with threads direct from the spool, and whose name appeared in our issue of Wednesday as They sew with threads direct from the spool, and require no re-winding.

Unlike other Machines, these fasten both ends of the seam by their own operation.

With these Machines, while silk is used upon the right or face-side of the seam, cotton may be used upon the other side. This can be done on no other Machine, and is a great saving upon all articles stitched or made up with silk.

FINIS GUANO DIFFERS FROM PERUVIAN

THIS GUANO DIFFER'S FROM PERUVIAN ... Guano simply in 'he relative proportions of the same elements of fertility.

Its use during the past four years for the culture of cotton and 'orn has given to it a character for standard excellence unsurpassed by genuine Peruvian Guano, and where seasons of drought intervene, i. produces a large increase of crops.

The price at whice this Guano is placed is so much below that of Peruvian Guano, as to constitute it an object of material importance to Southern Agriculture.

The large carital and resources of the Company emable it to furnish a Guano of the highest value at the lowest possible cost to consumers, and the highest interest of the Company is recognized in this policy.
